

PEPTIDE APIs

Biopeptek offers custom peptide APIs for pharmaceutical research & development. We support Chemistry, Manufacturing and Controls (CMC) regulatory documentation.

Our capabilities include:

- Liquid Phase Peptide Synthesis (LPPS)
- Solid Phase Peptide Synthesis (SPPS)
- Purification Scale up to 300 mm DAC Columns
- Bulk Tray Lyophilization

FULL-SERVICE CDMO

Biopeptek is your preferred partner for peptide manufacturing and life cycle development. Our commitment is to provide the highest quality products and services from early stage development to GMP manufacturing for clinical studies.

Our services include:

- Process Development
- Analytical Development and Validation
- Process Scale Up
- Reference Standard
- GMP Manufacturing
- Stability Studies
- Regulatory Support

RESEARCH PEPTIDES

Biopeptek has a full range of synthetic technologies and methodologies. We synthesize peptides up to 120 amino acids in length, and in quantities ranging from milligram to gram levels.

- Cyclization
- Multiple S-S Bonds
- Multiple Phosphorylation
- PEGylation
- Methylation
- Conjugation
- Fluorescent Labeling
- Isotope Labeling
- Stapled Peptides
- Hydrophobic Peptides
