01:00 pm - 01:45 pm	Sustainability in Pharma	Moderator: Pushpa Vijayaraghavan	Director,Sathguru Management Consultants	Sustainability & Indian Pharma: 360 degree focus Sustainability has emerged as a pervasive priority across the pharmaceutical value chain. Indian industry is no exception and the quest for sustainability is being pursued by corporate leaders across functions. Within the upstream realm, industry is pursuing cleaner approaches for API production including examples such as enzymatic bio-transformation in API. Effluent and waste is a focus across the API and pharma value chain and continues to provide significant opportunity for sustainability led initiatives. Manufacturing operations power efforts in the middle. Energy efficiency and overall focus on carbon footprint is driving significant change across operational footprint. Finally, transformation in packaging and supply chain is the last straw. Several initiatives have already been implemented in packaging across both domestic market products as well as exports. Supply chain and cold chain innovation is also true across product and market segments.
		Appasaheb Kabadagi	Head Site Operations,Alembic
