

CPHI Americas 2026 at a glance

The event where the pharma community meets, learns, and networks to shape the future of the industry

What made this edition special

This year's agenda reflected the industry's most pressing questions head-on. From navigating U.S. tariff pressures to rethinking pharmaceutical manufacturing in a shifting geopolitical landscape, sessions were built around what pharma leaders are actually grappling with right now, not just trends, but decisions that need to be made today.

Most popular sessions:

- The New Dynamics of U.S. Pharma: How Market Forces Are Redefining the Industry's Future
- Tariffs, Trade Wars & Packaging: Smart US Market Access for International CDMOs
- From Globalization to Geoeconomics: U.S. Pharmaceutical Manufacturing in a New Reality
- Fueling Biotech Breakthroughs: Investment Strategies and Startup Success in US Pharma R&D
